INSTALLATION

Step 1

Remove speaker from box.

Step 2

Mount bracket to wall.

Step 3

Locate euroblock in accessory bag and connect signal wire.
For daisy-chaining use “LINK” output to run to next speaker.

Step 4

Remove grille and set tap switch to proper setting.
Tap switch is preset to highest 100V position.

Step 5

For increased weather resistance in outdoor applications,
press port plug into port on the baffle.

Step 6

Insert euroblock into rear of speaker.

Step 7

Slide speaker into bracket and tighten bracket screws.

Step 8

Aim speaker and tighten bracket screws.
