

TTR 16K-1 EU

TOURING RACK

Description

TTR 16K-1 Rack is a rugged flight case, designed to house the essential electronics required to power TT+ GTX and GTS line array and subwoofer systems. The 3U Rack features an internal suspended cage, sliding doors, and two handles on each side for enhanced mobility and accessibility. Designed for touring and installed sound applications, this rack ensures secure equipment mounting, efficient API panel for easy and reliable cabling of the included XPS 16K power amplifier. All components are pre-wired for immediate "plug and play" operation, ensuring a streamlined setup and reliable performance in demanding audio environments.
